

Jeppe Dahl Guldager

Designer & Developer

Copenhagen, Denmark | Guldager.post@gmail.com

jdguldager.github.io | linkedin.com/in/jdguldager | github.com/JDGuldager

Profile

Designer and developer working across games, XR, and interactive applications. I help multidisciplinary teams shape experiences, build features, and integrate systems into working products. Experience with Unity, Unreal Engine, C#, Python, and version control.

Relevant experience

Game Designer | WiggleTree Studio · DADIU internship

September 2026 – present | Copenhagen

- Proposed Fyrmester's initial gameplay loop, refined it with the design team, and arranged floors around the flooding mechanic.
- Implemented Fyrmester's entire in-game UI and co-designed its camera. Fixed bugs and iterated through repeated testing; also contributed to Cartastrophe.

Teaching Assistant | Aalborg University

September 2025 – present | Copenhagen

Teaching assistant in Design of Immersive Experiences and Machine Learning for Multimedia Applications.

Selected projects

VR rehabilitation | VR development and published research

Implemented exercise validation, repetition counting, exertion warnings, avatar animation logic, and exercise-selection UI. Helped recruit participants, test, and iterate. Co-authored research published in IEEE VRW 2025.

The Interrogation | Bioadaptive narratives

Helped develop a machine-learning model estimating stress from EDA and blood-volume-pulse signals. Worked on optimisation, lighting, dialogue, and MetaHuman integration.

Custom Hardware Space Project | Individual project

Built an Arduino glove controller and integrated orientation, flex, and button input with Unity gameplay. Used deadzones and smoothing to reduce input jitter.

Education

MSc Medialogy | Aalborg University

2025 – 2027 (expected) · Copenhagen

BSc Medialogy | Aalborg University

2022 – 2025 · Bachelor's thesis grade: 12 (Danish grading scale)

Skills

Design: interaction design, game and level design, prototyping, UI features

Development: Unity, Unreal Engine, C#, Python, Git and version control, system integration
