

Jeppe Dahl Guldager

Designer & Developer

Copenhagen, Denmark | Guldager.post@gmail.com

jdguldager.github.io | linkedin.com/in/jdguldager | github.com/JDGuldager

Seeking full-time roles from summer 2027, after completing my master's degree.

Profile

Designer and developer working across games, XR, and interactive applications. I combine interaction design, hands-on implementation, testing, and system integration in multidisciplinary teams.

Relevant experience

Game Designer | WiggleTree Studio · DADIU internship

September 2026 – present | Copenhagen

- Proposed Fyrmester's initial gameplay loop, refined it with the design team, and arranged floors around the flooding mechanic.
- Implemented Fyrmester's entire in-game UI and co-designed its camera; fixed bugs and iterated through repeated testing during the three-week project.
- Designed and implemented Cartastrophe's scoring system and camera script; contributed to level design, the gameplay loop, and balancing in a one-week game jam.

Teaching Assistant | Aalborg University

September 2025 – present | Copenhagen

Teaching assistant in Design of Immersive Experiences and Machine Learning for Multimedia Applications.

Selected projects

VR rehabilitation | VR development and published research

Implemented exercise validation, repetition counting, exertion warnings, avatar animation logic, and exercise-selection UI. Helped recruit participants, test, and iterate. Co-authored research published in IEEE VRW 2025.

The Interrogation | Bioadaptive narratives

Helped develop a machine-learning model estimating stress from EDA and blood-volume-pulse signals. Worked on optimisation, lighting, dialogue, and MetaHuman integration.

VRStepulake | End-to-end VR / AR implementation

Handled end-to-end implementation and development iterations largely independently within a group project. Iterated through foot-tracking approaches for a reactive stepping experience; contributed to testing and academic writing.

Education

MSc Medialogy | Aalborg University

2025 – summer 2027 (expected) · Copenhagen

BSc Medialogy | Aalborg University

2022 – 2025 · Bachelor's thesis grade: 12 (Danish grading scale)

Skills

Design: interaction design, game and level design, prototyping, UI features

Development: Unity, Unreal Engine, C#, Python, Git, system integration

Research: participant recruitment, prototype testing, academic writing
